

ALC-1
Automatic Leveling Control

(+) 12 or 24 VDC input power
Use 14ga. wire
12vdc= 15 or 20 amp fuse
24vdc= 10 amp fuse
This input voltage
must match the voltage rating
on the actuators being used

- DC ground
Use 14 ga. wire

Optional: Connection to ignition key switch to initiate automatic tab retraction. Note: Tabs will automatically retract if the boat is stopped after a few minute delay if this connection is not used.
